The Thursday Difference

Our Values

Built in the American Heartland, Thursday Pools®' manufacturing facility sits on 56 acres in Fortville, Indiana. We are proud of our 30 year history in the fiberglass composite industry. Our organization operates by three guiding principles—**Honesty, Integrity and Mutual Respect**. These three principles set the foundation for all our decisions and are the cornerstone of all our dealer relationships. You can have peace of mind knowing that Thursday Pools® did their due diligence and carefully selected only quality dealers who we believe exemplify and support our mission of bringing high standards of ethics to the industry.

Quality Assurance

We practice a strict documented quality assurance program. Every mold is stored indoors, carefully reviewed, and thoroughly inspected before each pool is produced, our built-to-order production process means your pool is not 'old stock' or on a lot awaiting purchase out in the elements.

We are proud to be long standing members of the Association of Pool & Spa Professional (APSP) and the American Composite Manufacturing Association (ACME). We are EPA and OSHA compliant and in the process of being ISO9001 Certified.

Picture Perfect

Fiberglass Pool Anchoring System™

Beneath the Surface

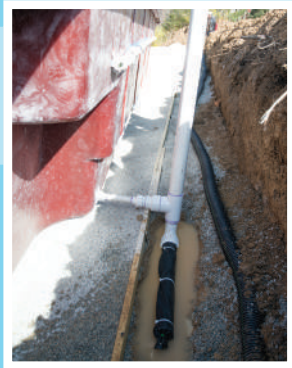

At Thursday Pools® we know it's what's underneath that counts and we believe product design and innovation is the best insurance you can have to protect your investment.

What it is...

This optional patent pending system uses two components to allow a fiberglass pool to be drained safely and worry-free. The patent pending Geo-Hydro Valve™ controls ground water and the patent pending Geo-Anchor Pool Wall™ anchors the pool to the earth providing you with the strongest pool construction available.

How it works...

Geo-Hydro Valve™

+

Geo-Anchor Pool Wall™

=

The ONLY fiberglass pool warranty that allows your pool to be drained!

All fiberglass pool manufacturers VOID your warranty if water levels drop below the skimmer. We are the first and only fiberglass pool manufacturer to offer a structural warranty that remains valid even when water levels goes below the skimmer. There may be a time when draining your pool is necessary. Now with this system, you can do so with peace-of-mind.

Colors

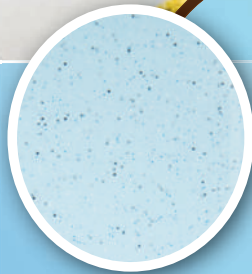

Set the mood

Our pool surface is absolutely eye-catching, spectacular and stunning. The gel coat surface is available in five designer colors that are formulated to last and look luxurious while doing it.

Ocean

Atlanta

Sandstone

California

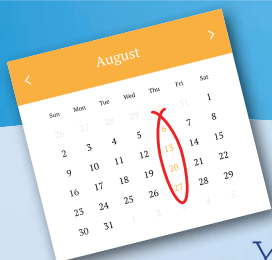

White

According to CCP Composites, the world's largest and oldest manufacturer of gel coat, with a Thursday pool you can feel confident in your purchase knowing that your pool surface is the most tested and most reputable on the market. We don't spend money on marketing gimmicks, just on quality ingredients.

Why Thursday?

We use the best gel coat available.

Customize Your Pool

Infinity Edges

An infinity edge can be added to any Thursday pool to showcase your unique backyard back drop! Infinity edges add the same style and elegance found in upscale luxury pools and spas around the world!

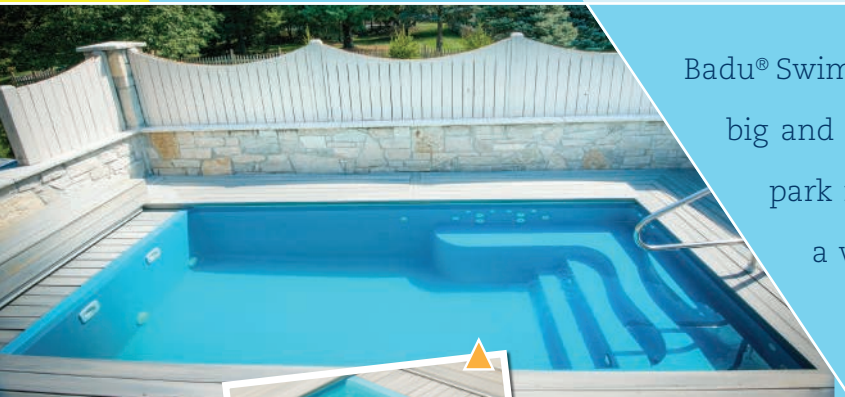

Custom Spillways

With our in-house tooling shop, we can customize your fiberglass pool or spa to create vanishing edges and spill ways. Whether you desire a full-length spillway or one 3' on-center spillway, Thursday Pools® can take your ideas to the drawing board and create your showcase pool.

Badu® Swim Jets

Badu® Swim Jet Systems make small pools big and big pools better! It's like having a virtual water park in your backyard. Great for boogie boarding and a workout. View on-line footage that demonstrates the system at www.badujet.com.

Covers

Safety First. Less Mess Later.

A beautiful pool in your backyard is a sanctuary. It's part of a lifestyle with elegant poolside soires and unforgettable barbecues and parties. Automatic Pool Covers helps you protect this sanctuary, along with those you care about most. In addition to the added security and peace of mind, owning an automatic pool cover will provide you with a more enjoyable ownership experience. An automatic pool cover will reduce the amount of time, money, and energy you spend on pool maintenance by keeping debris out and your heat and chemicals in.

Benefits of Fiberglass

Fiberglass pools are an icon of beauty that can rival any concrete or vinyl lined pool construction, but the surface beauty is just the beginning of why you should choose a fiberglass pool for your pool project.

Less Maintenance & Chemical Costs

Compared to traditional vinyl liner and concrete pools, our non-abrasive and non-porous fiberglass pool surface properties inhibit the growth of algae thus reducing the amount of time and chemicals needed to maintain the pool.

No Liner Replacement, Plastering, or Painting

Unlike any other type of pool surface, your fiberglass pool does not require any long term maintenance or replacement. You can live free of the maintenance worry so many people dread.

Beautifully Crafted Designs

In every fiberglass pool you will find strategically placed benches, sun ledges, step-outs and more... This not only makes the pools perfect for play but for getting the most fun and function out of every design.

High End Options Without The Costs

With vanishing edges, ceramic tile, benches and shallow lounging areas, the beauty of fiberglass pools can rival any concrete pool. Fiberglass pools in most markets are less expensive than a concrete pool and require less time to install and less maintenance later.

Pet Friendly

Fiberglass pools are known to be the most pet friendly pool surface. With fiberglass, you don't have to worry about tears or punctures. Several entry/ exit points also make it safer for your pet who will be curious about your new pool!

Financing

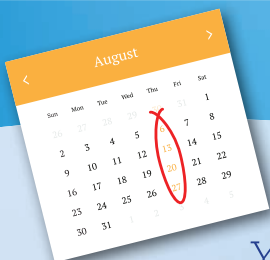

You Have Options

Thursday Pools® has partnered with several lending institutions to give you a wide range of financing options! Whether in the market for a home equity loan or low fixed-rate term loan, Thursday Pools can put you in touch with lenders that will work hard to make your dreams become reality.

Design Ideas

Tile

Add tile to intensify your water reflection and elevate the look of your entire back yard. Ask your dealer for details!

Water Features

The sound of water will enhance your swimming pool experience. Speak with your dealer about adding spill over water features, deck jets, bubblers and more!

Lighting

Your dealer can help you transform your daytime party pool into a nightlife hot spot!

World Class Manufacturing

Made in North America

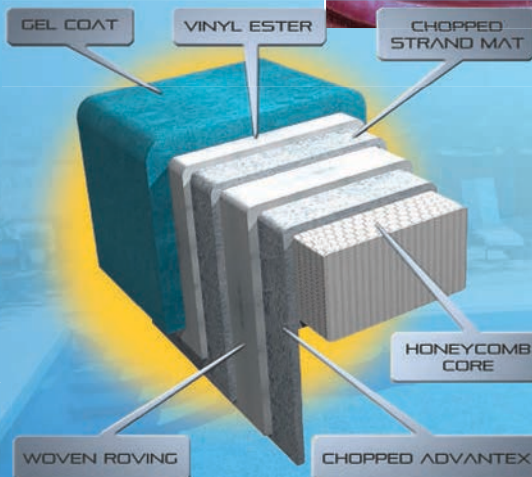

All our gel coat, resins, fiberglass and core materials are made in North America. This assures quality and reduces our environmental footprint. Why not purchase superior quality materials made in North America? Why ship materials from halfway across the world when superior materials are available here?

#keepingitlocal

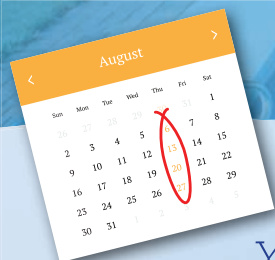

Beyond the Surface

We use Corrosion Resistant fiberglass to prevent osmotic blisters. In addition to using a Vinyl Ester Barrier Coat, we use Owens Corning™ Advantex® Boron Free E-CR Glass instead of the industry standard E-Glass.

Thursday Pools® has engineered and implemented the most durable fiberglass pool laminate schedule ever. This construction provides incredible strength, flexibility and peace of mind.

Why Thursday Pools®?

NOT ALL FIBERGLASS POOLS ARE CREATED EQUAL, WE STAND BEHIND OURS. HONESTY. INTEGRITY.

Unique Craftsmanship

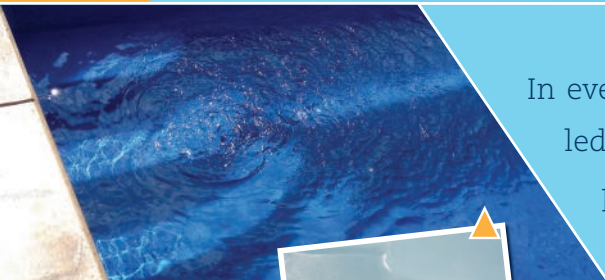

We don't use a shotgun approach to design, only a focused and collaborative effort with our dealers to produce stunning and functional design. The mold sets the foundation for which all pools will be produced and we want complete control over it, from our house to yours.

Pool Perfection

All our molds have a complete steel substructure and are stored indoors in a hospital clean environment. This ensures that not only does your pool have a spotless finish but is laser straight, solid and will last more than a lifetime.

Proprietary Texture

In every fiberglass pool you will find strategically placed benches, sun ledges, step-outs and more... This not only makes the pools perfect for play but for getting the most fun and function out of every design.

Superior Strength

We add supports using a tubular construction method and a honeycomb core to all horizontal surfaces. These additions ensure your step into the pool is solid and provides additional rigidity and strength for an easy and flawless installation.
